

Expression of Interest to work with renewable energy in beautiful Gran Canaria (must hold a PhD)

Floating Power Plant A/S (FPP) offer an opportunity for candidates holding a Ph.D. to join our fast-growing business enabling a greener future. If you want to have direct influence and be part of a renewable energy adventure and work in our Gran Canaria office

FPP develops floating wind, wave and hydrogen platforms delivering reliable, renewable energy to offshore locations like island communities. FPP is based in Denmark but has offices in the UK and the Canary Islands.

Application deadline: 31st December, 2022

Job starts: 1st September, 2023

To apply: Send a CV + cover letter to hr@floatingpowerplant.com with subject "EoI with PhD"

Requirements

- Ph.D. in a relevant subject (can be from any university). We are very open to different subjects, so no matter if you are an expert on electricity, renewable energy, naval architecture, business development, or something entirely different – you are most welcome to apply or contact us.
- Must have graduated PhD by 31st January 2023 (note, there is no earliest graduation date)

Other Attributes

- Strong written communications and presentation skills.
- Ability to work across cultures and in different geographies.
- Proficient knowledge of Microsoft Office software (Excel, PowerPoint, Word).
- Ability to travel occasionally.

We offer:

- The office is in sunny Gran Canaria close to one of our on-going projects at the PLOCAN-site.
- You would be part of an amazing international team of co-workers who will help you get on board both professionally and socially.
- Possibilities to travel to relevant conferences, meetings, and company events.
- Possibilities to grow and advance both as a person and within the company.
- An opportunity to be part of the solution of the future.
