

Engineering Manager

Floating Power Plant A/S (FPP) have an opportunity for an experienced engineering manager / technical project manager to join our fast-growing business and lead the technical development of key projects. Your main task will be the engineering manager role for our integrated floating wind, wave and hydrogen demonstration project in Spain. This will be a global flagship project. If you want to have direct influence and be part of a renewable energy adventure – please send an application to HR@floatingpowerplant.com

Tasks

- Coordination and scheduling of engineering tasks
- Develop relevant engineering policies and procedures and ensure engineering team's compliance
- Providing technical input to the procurement process for major contracts
- Contribute into and deliver against the engineering Budget in line with overall project
- Deliver integrated, cross discipline engineering solutions and facilitating the key technical interfaces

Education, Skills and Experience

Required

- Relevant degree in relevant Engineering / science discipline
- 5 + years of proven experience in either wind, oil and gas, marine or energy infrastructure industries.
- Proficiency in supervising engineering teams in an international context.
- Knowledge of Health and Safety legislation and quality management processes
- Must be eligible to work in Denmark

Desirable

- Experience in floating offshore wind, marine systems engineering or power systems engineering
- Experience working with shipyards / heavy industry

Other Attributes

- Proficient knowledge of Microsoft Office software (Excel, PowerPoint, Word).
- Strong written communications and presentation skills.
- Ability to work across cultures and in different geographies.
- People management skills particularly in view of coordinating multi-disciplinary teams.
- Ability to travel occasionally.

What we offer

- FPP is a Danish company, backed by 240 shareholders, rapidly expanding in order to develop and commercialise the world's first floating wind and wave device
- We have a fast-paced and fun environment with varied tasks and a great team

- You will be working alongside colleagues and external partners who are the leaders in their fields
- The work which you undertake will be key to the company's success, and will directly impact the design of FPP's technology and our commercial projects
- Attractive working terms
 - Competitive salary and share option program (warrants) - meaning you can own a part of our success
 - Great working conditions incl. flexible working hours, pension, 6 weeks holiday, option to work in other offices, etc.
 - Good working environment incl. lunch, social events, modern facilities, etc
 - Regular Friday drinks and other events with colleagues
- We are an international team so the main office language is English.
- The place of work is Vallensbæk, Denmark or Gran Canaria, Spain (FPP's technical team is located in these two offices)

Cross competencies

Please note we are currently looking for 7 new colleagues. If your skill set overlap some of the other positions, please emphasise this, as this will be evaluated positively.
